

No one has more ENERGY STAR qualified printers than Epson.

Reduce your power consumption and costs with Epson POS printers.

When it comes to low power consumption, Epson sets the standard. Not only does Epson have the most ENERGY STAR® qualified POS printers available, but in the latest side-by-side comparisons with other competitive models,¹ Epson printers won hands down using up to 89% fewer kilowatt hours as compared to other printers in their classes.

And that's not all. With Epson's new print options, you can reduce paper usage for receipts up to 25% by reducing white space without impacting the size and readability of the text. Put this together with Epson's fast printing speeds and best-in-class reliability and you have all the features you need to reduce costs and keep customer lines moving. To find out more about Epson's energy-saving printers, go to pos.epson.com.
